500.I

ENA 2713, f. 20 Fig + The names of households preserved

2. (6) (list of ~~about~~ 501 persons, ~~about~~ at least

167 which <sup>id</sup> identical with B1, ~~in receipt of~~ least

17 receive 5 (litres), <sup>basic</sup> The need for ~~dist~~ <sup>collected</sup> given to a person already on 5 litres, as is common

167 - 10

89 - 15

4 - 20

1 - 25

1 - 30

from which items as "the man from Malix - 10

mother - 10", The daughter of Missie G's mother - 10.

The two women from Parule - 10.

in the same script & arrangements as B1 and 2a.

In several cases the numbers 1 or 2 are written after the numbers 10, 15 and 20. This could <sup>be a</sup> ~~mean~~ <sup>represent</sup> a simple

Had the full list sheet been preserved at least at the full length like of B1 the communal expenditure on this charity (presumably a distribution of food for a holiday) would have reached about 1500 litres. Even <sup>assuming the lowest value of 10</sup> ~~without~~ the distribution <sup>at 10 litres</sup> (Med Soc. I p 271, sec. 8)

so this would correspond to 30 litres, twice as much

as the distribution of bread in B24 during one month.

85 additional  
170 payments (fines)  
135 then the number would  
80 then changed to 10  
25 16 or 17 respectively)  
20 but must be  
525 ~~the number~~ many,  
~~total 1500~~
